

Ms. Meyer's Science Work

Week 9 - May 11 - May 15

Monday, May 11 - Thursday May 14

1. **Each day** you will be using the Google Doc that I posted Last Tuesday, May 5 to record your observations and answer the required questions for that day!
2. Because these are daily observations, your observations for each day will be due by **MIDNIGHT THAT SAME DAY!**

Friday, May 15

1. FINAL DAY! A bittersweet day, I am going to miss you ALL SO much!
2. One small requirement for the day is to answer a few questions on the google doc page (these are general questions about the WHOLE year)
3. The last small requirement for the day is to make a final FlipGrid where you show me the final result of your two grass plants and explain which one grew the best grass and why you think that is! The questions will be posted in a google doc
