

# Ms. Meyer's Science Work

Week 7 - April 28 - May 1

\*Plans are subject to change\*

Monday, April 27

1. For today's lesson, you guys are going to be challenged to find 5 different times from NATURE (that means you need to go outside) and make a prediction about whether or not they are more or less dense than water. You will then create a Flip Grid and you will show us what you found in nature and then explain to us whether or not it is more or less dense than water and WHY.

Tuesday, April 28 - Friday May 1

1. Complete the Project that is posted and outlined in Google Classroom. This will be all of your work for the rest of this WEEK and is **due on Friday by 3pm!** Good Luck and get creative!
